

SATELLITE DISH / CABLE / INTERNET APPROVAL PROCEDURE

You are required to obtain approval from the building's Property Supervisor prior to having your satellite dish, cable or internet service installed by the Service Provider (DirecTV, Time Warner, etc.). Check with the Property Supervisor to determine if your unit has been pre-wired and is satellite/cable/internet ready (in which case the Service Provider can hook up to existing wiring).

Before installation, please read and inform your Service Provider of the following:

1. Your satellite dish must be installed on the existing platform on the roof.
2. Cables must be in conduit run down the side or back of the building.
3. The installation must not be visible from the front of the building or the courtyard.
4. Do not penetrate the roof of any part of the building.
5. Under no circumstance should you or your Service Provider staple wires, drill holes or nail anything into the woodwork (door jams, floor molding, ceiling molding, etc.) or put holes in the carpeting or flooring. You will be responsible for the cost of repairing, patching, sanding and painting any damaged woodwork, drywall or flooring and the cost of replacing damaged carpeting.
6. If the installation is not done to our specifications we will remove/reinstall it at your expense.
7. A minimum of \$150 will be charged to remove the satellite dish and/or any cable equipment/wiring left upon your vacating the premises. Additional charges will include repairs under item #5 above.

If you have any questions, please
email ntmanagements@yahoo.com or call (310) 628-9744.

THANK YOU FOR YOUR COOPERATION
